G8 Science Ministers Statement

4. Expanding Access to Scientific Research Results

We recognise that effective global scientific research and public understanding of science and commercial innovation by enterprises is supported by free and rapid public access to published, publicly funded research. The generation, sharing and exploitation of scientific knowledge are integral to the creation of wealth and the enhancement of our quality o life. We recognise that G8 nations have an important opportunity and responsibility to promote policies that increase access to the results of publicly funded research results to spur scientific discovery, enable better international collaboration and coordination of research, enhance the engagement of society and help support economic prosperity.

i. We endorse the principle that increasing access to the peer-reviewed, published results of publicly funded published research will accelerate research, drive innovation, and benefit the economy.

ii. We recognise the importance of peer review and the valuable role playe by publishers, including Learned Societies. Increasing free access to peer-reviewed, published research results will require sustainable solutions

What is the size of the largest data set that you have used or generated in your research?

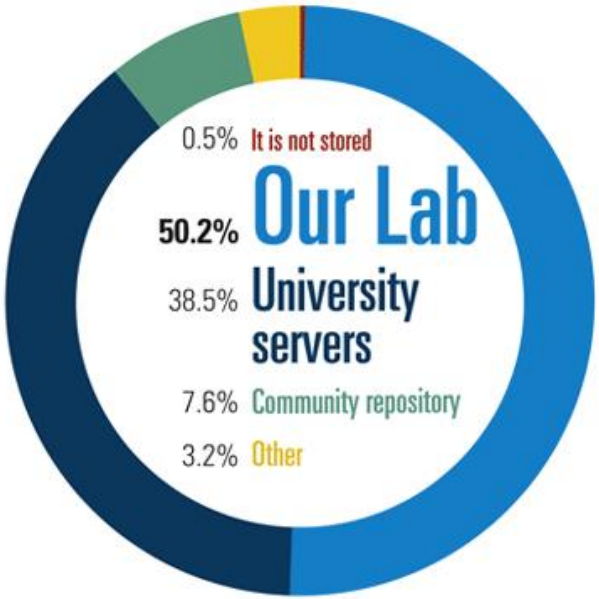

Science 11 February 2011:
Vol. 331 no. 6018 pp. 692-693
DOI: 10.1126/science.331.6018.692

Where do you archive most of the data generated in your lab or for your research?

"Even within a single institution **there are no standards for storing data**, so each lab, or often each fellow, uses ad hoc approaches."

What is Edinburgh DataShare?

Edinburgh DataShare is an online digital repository of multi-disciplinary research datasets produced at the University of Edinburgh, hosted by the Data Library in Information Services.

Edinburgh University researchers who have produced research data associated with an existing or forthcoming publication, or which has potential use for other researchers, are invited to upload their dataset for sharing and safekeeping. A persistent identifier and suggested citation will be provided.

Interest Group "Usage Data and Beyond"

The IG deals with interoperable usage statistics, e.g. combining usage data from multiple sources or to offer a common robot blacklist. It aims at collecting experiences from several projects and initiatives in order to standardize the gathering of usage data.

Versión traducida 23 de octubre de 2013.

Reconocimientos
El siguiente informe fue posible debido a las numerosas contribuciones hechas por la comunidad de repositorios alrededor del mundo. COAR quiere agradecer y reconocer a todos aquellos que han realizado este esfuerzo.

Sobre COAR
La Confederación de Repositorios de Acceso Abierto (Confederation of Open Access Repositories - COAR), es una joven y creciente asociación de iniciativas para los repositorios. Lanzada en octubre de 2009, COAR cuenta en la actualidad con más 100 miembros en todo el mundo provenientes de 35 países y 4 continentes. Su Misión es la de aumentar la visibilidad y la aplicación de resultados de investigaciones a través de una red global de repositorios digitales de acceso abierto.
