JUENES BAIN.

American Museum of Natural History.

Central Park West.

New York City.

Estados Unidos.

Dear Junius:

By ordinary mail we are sending a copy of the Revista del Instituto de Antropología de la Universidad Nacional del Litoral, Rosario. I it finally appeared Max Bain's paper on Sandoz's collection.

If you think that the way it is printed, it is not too bad, I would like to ask you the of sending me a Ph. D. thesis on archaeology that you directed some ten years ago. That thesis was written by Mary Shepard Slosser, its title is: "Preliminary Archaeological Studies of Northern Central Chile", and I think never was printed. I took good notes on its and I think that to the Chilean and Argentine archaeology still is important its publications. You can send me the copy that is in the file of the Museo and I will send it back as I did with Max Bain paper.

Give me your opinion on the Revista. Any observation is welcome.

With the best regards to you and your family; as ever.
